An investor, by subscribing or purchasing an interest in the Product(s), will be regarded as having acknowledged, understood and accepted the disclaimer referred to in Clauses above and will be bound by it.

HIGHLIGHTS/SUMMARY OF THE SCHEME

Sr. No.	Title	Description
I.	Benchmark (TRI)	<p>The performance of the scheme will be benchmarked to Nifty 50 Total Return Index.</p> <p><u>Rationale for adoption of benchmark:</u></p> <p>The Trustees have adopted Nifty 50 Total Return Index as the benchmark index.</p> <p>The benchmark has been chosen as the Scheme will invest in securities which are constituents of Nifty 50 Total Return Index. Thus, the composition of the aforesaid benchmark is such that it is most suited for comparing the performance of the Scheme.</p>
II.	Plans and Options Plans/Options and sub options under the Scheme	<p>The Scheme will have Regular Plan and Direct Plan** with a common portfolio and separate NAVs. Investors should indicate the Plan for which the subscription is made by indicating the choice in the application form.</p> <p>Each of the above Regular and Direct Plan under the scheme will have the following Options / Sub-options: (1) Growth Option and (2) Income Distribution cum Capital Withdrawal option (IDCW).</p> <p>The Income Distribution cum capital withdrawal option shall have 2 sub options: (a) Payout of Income Distribution cum capital withdrawal option (“Payout of IDCW”) (b) Reinvestment of Income Distribution cum capital withdrawal option (“Reinvestment of IDCW”).</p> <p>Amounts can be distributed out of investors capital (Equalization Reserve), which is part of sale price that represents realized gains.</p> <p>The default option for the unitholders will be Regular Plan - Growth Option if the investor is routing its investments through a distributor and Direct Plan – Growth option in case of direct investor.</p> <p>If the unit holders select IDCW option but does not specify the sub-option then the default sub-option shall be Reinvestment of IDCW.</p> <p>**DIRECT PLAN: Direct Plan is only for investors who purchase /subscribe Units in a Scheme directly with the Mutual Fund and is not available for investors who route their investments through a Distributor.</p>

		<p>refer to the website of the AMC (https://www.miraeassetmf.co.in/) or may call at '1800 2090 777' or your distributor.</p> <p>Exit Load: NIL</p> <p>No Exit Load shall be levied in case of switch transactions from Regular Plan to Direct Plan vice versa.</p> <p>As per clause 10.6 of SEBI Master Circular dated June 27, 2024, no load would be charged on Bonus units.</p> <p>The Mutual Fund may charge the load within the stipulated limit of 3% and without any discrimination to any specific group. The Repurchase Price however, will not be lower than 97% of the NAV.</p> <p>The Trustee reserves the right to modify/alter the load structure and may decide to charge on the Units with prospective effect, subject to the maximum limits as prescribed under the SEBI Regulations. At the time of changing the load structure, the AMC shall take the following steps:</p> <ul style="list-style-type: none"> • Arrangements shall be made to display the changes/modifications in the SID in the form of a notice in all the Mirae Asset ISCs' and distributors' offices and on the website of the AMC. • The notice-cum-addendum detailing the changes shall be attached to SIDs and Key Information Memoranda. The addendum will be circulated to all the distributors so that the same can be attached to all SIDs and Key Information Memoranda already in stock. • The introduction of the exit load along with the details shall be stamped in the acknowledgement slip issued to the investors on submission of the application form and may also be disclosed in the statement of accounts issued after the introduction of such load. • A public notice shall be given in respect of such changes in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of region where the Head Office of the Mutual Fund is situated. • Any other measures which the mutual funds may feel necessary. <p>The AMC may change the load from time to time and in case of an exit/repurchase load this may be linked to the period of holding. It may be noted that any such change in the load structure shall be applicable on prospective investment only. The exit load (net off GST, if any, payable in respect of the same) shall be credited to the Scheme of the Fund.</p> <p>The distributors should disclose all the commissions (in the form of trail commission or any other mode) payable to them for the different</p>

		competing schemes of various mutual funds from amongst which the scheme is being recommended to the investor.						
IV.	Minimum Application Amount/switch in	<p>On continuous Basis:</p> <p>Rs.5,000/- per application and in multiples of Re. 1/- thereafter.</p> <p>Investments through SIP: Rs.99/- and in multiples of Re. 1/- thereafter.</p> <p>The Minimum Application shall not be applicable to the mandatory investments made in the Scheme pursuant to the provisions of clause 6.9 and 6.10 of SEBI Master Circular dated June 27, 2024, as amended from time to time.</p>						
V.	Minimum Additional Purchase Amount	<p>On continuous Basis:</p> <p>For subsequent additional purchases, the investor can invest with the minimum amount of Rs. 1,000/- and in multiples of Re. 1/- thereafter.</p>						
VI.	Minimum Redemption/switch out amount	<p>On continuous Basis:</p> <p>The minimum redemption amount shall be ‘any amount’ or ‘any number of units’ as requested by the investor at the time of redemption.</p>						
VII.	Tracking Error	<p>Tracking error is the standard deviation of the difference in daily returns between the Scheme and the underlying index annualized over 1-year period. Under normal circumstances, such tracking error is not expected to exceed 2% per annum for past one year rolling data. In case of unavoidable circumstances in the nature of force majeure, which are beyond the control of the AMCs, the tracking error may exceed 2% and the same shall be brought to the notice of Trustees with corrective actions taken by the AMC.</p> <table border="1"><tr><th colspan="2">Tracking Error for the scheme as on September 30, 2025</th></tr><tr><td>Regular Plan</td><td>Direct Plan</td></tr><tr><td>0.10%</td><td>0.10%</td></tr></table> <p>The AMC shall disclose tracking error based on past one year rolling data, on a daily basis, on the website of AMC on ETF Mutual Fund: Invest in Exchange Traded Funds Online Mirae Asset (miraeassetmf.co.in) and AMFI.</p>	Tracking Error for the scheme as on September 30, 2025		Regular Plan	Direct Plan	0.10%	0.10%

Tracking Difference based on 5 Year	-	-																		
Tracking Difference based on 10 Year	-	-																		
Tracking Difference based on since allotment	-0.87%	-0.27%																		
IX.	Computation of NAV	<p>The NAV of the Units of the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation date.</p> <p>NAV of Units under the Options there under can be calculated as shown below:</p> $\text{NAV} = \frac{\text{Market or Fair Value of Scheme's investments} + \text{Current assets including Accrued Income} - \text{Current Liabilities and provisions including accrued expenses}}{\text{No. of Units outstanding under the Scheme/Option.}}$ <p>The NAV, the sale and repurchase prices of the Units will be calculated and announced at the close of each working day. The NAVs of the Scheme will be computed and units will be allotted upto 4 decimals.</p> <p>Detailed Disclosure on computation of NAV is provided on – https://www.miraeassetmf.co.in/downloads/statutory-disclosure/other-disclosure/offer-documents-data-passives </p>																		
X.	Asset Allocation	<p>This scheme tracks Nifty 50 Total Return Index.</p> <p>Under normal circumstances, the asset allocation will be as follows:</p>																		

		<table><tr><th>Types of Instruments</th><th colspan="2">Indicative allocation (% of total assets)</th></tr><tr><td>Equity Securities covered by Nifty 50 Total Return Index</td><td>95</td><td>100</td></tr><tr><td>Money market instruments / debt securities, Instruments and/or units of debt/liquid schemes of domestic Mutual Funds</td><td>0</td><td>5</td></tr></table>	Types of Instruments	Indicative allocation (% of total assets)		Equity Securities covered by Nifty 50 Total Return Index	95	100	Money market instruments / debt securities, Instruments and/or units of debt/liquid schemes of domestic Mutual Funds	0	5
Types of Instruments	Indicative allocation (% of total assets)										
Equity Securities covered by Nifty 50 Total Return Index	95	100									
Money market instruments / debt securities, Instruments and/or units of debt/liquid schemes of domestic Mutual Funds	0	5									
		<p>*Money Market Instruments will include only treasury bills and government securities having a residual maturity upto one year, Tri-party Repo on government securities or T-bills and any other like instruments as specified by the Reserve Bank of India from time to time.</p> <p>The net assets of the scheme will be invested in stocks constituting the Nifty 50 Index. This would be done by investing in all the stocks comprising the Nifty 50 Index in the same weightage that they represent in the Nifty 50 Index.</p> <p>The Asset Allocation portion shall also include subscription and redemption cash flow which may be undeployed due to various reasons (dividend from underlying securities, rebalancing or balances for running cost of the scheme, residual amount due to execution on rounding off etc).</p> <p>Subject to SEBI (MF) Regulations, 1996 and in accordance with Clause 12.11 in SEBI Master Circular dated June 27, 2024 on Securities Lending Scheme, and framework for short selling and borrowing and lending of securities, the Scheme intends to engage in Stock Lending.</p> <p>The Scheme shall adhere to the following limits should it engage in Stock Lending:</p> <p>(a) Not more than 20% of the net assets can generally be deployed in Stock Lending</p> <p>(b) Not more than 5% of the net assets can generally be deployed in Stock Lending to any single approved intermediary i.e. broker.</p> <p>Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period which shall not exceed 7 days. The exposure to derivatives will be rebalanced to align with the underlying index changes in weights or constituents. Index futures/options are meant to be an efficient way of buying/selling an index compared to</p>									

		<p>buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme.</p> <p>The Scheme does not intend to undertake/ invest/ engage in</p> <ul style="list-style-type: none"> • ADR/ GDR / Foreign Securities • Securitized Debt • Debt Instruments with Structured obligation/Credit enhancements • Repo in Corporate Debt Securities • Short selling • Credit default swaps • Unrated debt and money market instruments (except G-Secs, T-Bills and other money market instruments) • Unlisted debt instrument • Inter scheme transactions • Bespoke or complex debt products • Instruments having Special Features as defined under clause 12.2 of SEBI Master Circular dated June 27, 2024 • ReITs and InvITs • Fund of Fund Schemes <p>The cumulative gross exposure through equity, debt, derivative positions, Money market instruments / debt securities, Instruments and/or units of debt/liquid schemes of domestic Mutual Funds will not exceed 100% of the net assets of the scheme in accordance with Clause 12.24 of SEBI Master Circular dated June 27, 2024.</p> <p>Cash or cash equivalents with residual maturity of less than 91 days may be treated as not creating any exposure. SEBI vide letter dated November 3, 2021 has clarified that Cash Equivalent shall consist of</p>
--	--	---

	<p>Government Securities, T-Bills and Repo on Government Securities having residual maturity of less than 91 days.</p> <p>In accordance with Clause 3.4 of SEBI Master Circular dated June 27, 2024, the underlying index shall comply with the portfolio concentration norms as prescribed.</p> <p>Debt securities include, but are not limited to, Debt securities of the Government of India, State and Local Governments, Government Agencies, Statutory Bodies, Public Sector Undertakings, Public Sector Banks or Private Sector Banks or any other Banks, Financial Institutions, Development Financial Institutions, and Corporate Entities, collateralized debt securities or any other instruments as may be prevailing and permissible under the Regulations from time to time).</p> <p>The Debt Securities (including money market instruments) referred to above could be fixed rate or floating rate, listed, unlisted, privately placed, unrated among others, as permitted by regulation.</p> <p>Pending deployment of funds of a Scheme in securities in terms of investment objectives of the Scheme a mutual fund can invest the funds of the Scheme in short term deposits of scheduled commercial banks in terms of Clause 12.16 of SEBI Master Circular dated June 27, 2024.</p> <p>Further, the Scheme may, for meeting liquidity requirements invest in units of money market/liquid schemes of Mirae Asset Mutual Fund and/or any other mutual fund provided that aggregate inter-scheme investment made by all schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the net asset value of the mutual fund in accordance with Clause 4 of Seventh Schedule of SEBI (Mutual Funds) Regulations, 1996. The AMC shall not charge any investment management fees with respect to such investment.</p> <p>Indicative Table (Actual instrument/percentages may vary subject to applicable SEBI circulars)</p> <table><tr><th>Sl. no</th><th>Type of Instrument</th><th>Percent age of exposure</th><th>Circular references*</th></tr><tr><td>1</td><td>Equity Derivatives</td><td>20%</td><td>Clause 12.25 of SEBI Master Circular dated June 27, 2024</td></tr></table>	Sl. no	Type of Instrument	Percent age of exposure	Circular references*	1	Equity Derivatives	20%	Clause 12.25 of SEBI Master Circular dated June 27, 2024

- (v) The contents of the Scheme Information Document including figures, data, yields etc. have been checked and are factually correct.
- (vi) A confirmation that the AMC has complied with the compliance checklist applicable for Scheme Information Documents and other than cited deviations/ that there are no deviations from the regulations
- (vii) Notwithstanding anything contained in this Scheme Information Document, the provisions of the SEBI (Mutual Funds) Regulations, 1996 and the guidelines there under shall be applicable.
- (viii) The Trustees have ensured that the **Mirae Asset Nifty 50 Index Fund** approved by them is a new product offered by Mirae Asset Mutual Fund and is not a minor modification of any existing scheme/fund/product.

Notwithstanding anything contained in the Scheme Information Document, the provisions of the SEBI (Mutual Funds) Regulations, 1996 and the guidelines there under shall be applicable.

THE TERMS OF THE SCHEME WERE APPROVED BY THE DIRECTORS OF MIRAE ASSET TRUSTEE COMPANY PRIVATE LIMITED AT THEIR MEETING HELD ON JANUARY 30, 2024.

For and on behalf of the Board of Directors of

Mirae Asset Investment Managers (India) Private Limited
(Asset Management Company for Mirae Asset Mutual Fund)

Sd/-

Rimmi Jain

Head- Compliance, Legal & Company Secretary

Place: Mumbai

Date: November 29, 2025

ANNEXURE 1 –

<p>Equity derivatives of underlying securities forming part of the index may also be available as an investment option in case the underlying security is not available for purchase.</p>	<ul style="list-style-type: none"> • <u>Calculation of cumulative gross exposure</u> <p>The scheme(s) will comply with the provision no. 12.24.1 of SEBI Master Circular on Mutual Fund dated June 27, 2024 which specifies that the cumulative gross exposure through equity, debt, derivative positions, Money market instruments / debt securities, Instruments and/or units of debt/liquid schemes of domestic Mutual Funds will not exceed 100% of the net assets of the scheme.</p> <ul style="list-style-type: none"> • <u>Numerical example of risk involved</u> <p>Risks Associated with Derivatives</p> <p>The risks associated with the use of derivatives are different from or possibly greater than the risks associated with investing directly in securities and other traditional instruments. Such risks include mispricing or improper valuation and the inability of derivatives to correlate perfectly with underlying assets, rates and indices. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However the gains of an options writer are limited to the premiums earned. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The loss can be unlimited as underlying asset can increase to any levels. The writer of a put option bears the risk of loss if the value of the underlying asset declines below the exercise price and the loss is limited to strike price.</p> <p>Investments in futures face the same risk as the investments in the underlying securities. The extent of loss is the same as in the underlying securities. However, the risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. The derivatives are also subject to liquidity risk as the securities in the cash markets. The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility in the values.</p> <p>Concepts and Examples of investing into Derivatives</p> <p>Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as: interest rates, exchange rates, commodities and equities.</p> <ul style="list-style-type: none"> • Futures <p>A futures contract is an agreement between the buyer and the seller for the purchase and sale of a particular asset at a specific price on a specific future date.</p>
--	---

The price at which the underlying asset would change hands in the future is agreed upon at the time of entering into the contract. The actual purchase or sale of the underlying asset involving payment of cash and delivery of the instrument does not take place until the contracted date of delivery. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

Currently, futures contracts have a maximum expiration cycle of 3-months. Three contracts are available at any time for trading, with 1 month, 2 months and 3 months expiry respectively. Futures contracts typically expire on the last Thursday of the month. For example, a contract with the January expiration expires on the last Thursday of January.

A futures contract on the stock market index gives its owner the right and obligation to buy or sell the portfolio of stocks characterized by the index. Stock index futures are cash settled; there is no delivery of the underlying stocks.

Let us assume that the Nifty Index at the beginning of the month October 2018 was 5070 and three index futures as under were available:

Expiry Month	Bid Price	Offer Price
October 18	5075	5080
November 18	5085	5090
December 18	5095	5100

The Scheme could buy an index future of October, 2018 at the offer price of Rs. 5080. The Fund will be required to pay the initial margin as required by the exchanges.

The following is a hypothetical example of a typical trade in index future and the costs associated with the trade.

Particulars	Index Future	Actual Purchase of Stocks
Index as on beginning October 2018	5070	5070
October 2018 Futures Price	5080	-
1. Carry Cost associated with Futures	10 (5080-5070)	
2. Brokerage Cost @ 0.02% for Index Future and 0.03% for Cash Markets	1.016 (0.02% of 5080)	1.521 (0.03% of 5070)
3. Securities Transaction Tax (STT) STT on purchase of index futures – NIL	NIL (0% of 5080)	1.2675 (0.025% of 5070)

STT on purchase of stocks – 0.025%		
4.Gain on Surplus Funds (Assumed 6% returns on 75% of the money left after paying margin of 25%)	18.74 (6%*(100% of 5070 – 25% of 5080)*30/365)	NIL
Spot Market Price at the expiry of October Contract	5569	5569
5.Brokerage Cost on Sale @ 0.02% for Index Future and 0.03% for Cash Markets	1.114 (0.02% of 5569)	1.671 (0.03% of 5569)
6.Securities Transaction Tax STT on sale of index future – 0.025% STT on sale of stocks – 0.025%	1.114 (0.025% of 5569)	1.392 (0.025% of 5569)
Total Cost (1+2+3-4+5+6)	-5.50	5.85

Please note that the above example is based on assumptions and is used only for illustrative purposes (including an assumption that there will be a gain pursuant to investment in index futures). As can be seen in the above example, the costs associated with the trade in futures are less than that associated with the trade in actual stock. Thus, in the above example the futures trade seems to be more profitable than the trade in actual stock. However, buying of the index future may not be beneficial as compared to buying stocks if the execution and brokerage costs on purchase of index futures are high and the return on surplus funds are low. The actual returns may vary based on actuals and depends on final guidelines / procedures and trading mechanism as envisaged by stock exchanges and other regulatory authorities.

- Options**
An option is a contract which provides the buyer of the option (also called the holder) the right, without the obligation, to buy or sell a specified asset at an agreed price on or upto a particular date. For acquiring this right the buyer has to pay a premium to the seller. The seller on the other hand has the obligation to buy or sell that specified asset at the agreed price. The premium is determined considering number of factors such as the underlying asset's market price, the number of days to expiration, strike price of the option, the volatility of the underlying asset and the risk less rate of return. The strike price, the expiration date and the market lots are specified by the exchanges.
- An option contract may be of two kinds, viz., a call option or a put option. An option that provides the buyer the right to buy is a call option. The buyer of the call option (known as the holder of the option) can call upon the seller of the option (known as writer of the option) and buy from him the underlying asset at the agreed

price at any time on or before the expiry date of the option. The seller of the option has to fulfill the obligation on exercise of the option.

The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Options are of two types: European and American. In a European option, the holder of the option can only exercise his right on the date of expiration. In an American option, he can exercise this right anytime between the purchase date and the expiration date.

Example of options

Buying a Call option: Assume that the Scheme buys a call option at the strike price of Rs. 5,000 and pays a premium of Rs. 100. If the market price of the underlying stock on the date of expiry of the option is Rs. 5,400 (i.e. more than Rs. 5,000 which is the strike price of an option), the Scheme will exercise the option. However, it may not result into profit. The profit is made only in those circumstances when the intrinsic value (5400 (spot price)-5000(strike price)) is greater than cost paid i.e. option premium (100). If on the date of the expiry of the option, the market price of the underlying stock is Rs. 4,900, the Scheme will not exercise the option and it shall lose the premium of Rs. 100.

Thus, in the above example, the loss for the Scheme, as the buyer of the option, is limited to the premium paid by him while the gains are unlimited.

Writing a Call Option: Assume that the Scheme writes a call option at the strike price of Rs. 5,000 and earns a premium of Rs. 100. If the market price of the underlying stock on the date of expiry increases to Rs. 5,400 (i.e. more than Rs. 5,000) then the option is exercised. The Scheme earns the premium of Rs. 100/- but loses the difference between the market price and the exercise price i.e. Rs. 400/-. In case the market price of the underlying stock decreases to Rs. 4,900, the Scheme gets to keep the premium of Rs.100.

Buying a Put Option: Assume that the Scheme buys a put option at the strike price of Rs. 5,000 and pays a premium of Rs. 100. If the market price of the underlying stock decreases to Rs. 4,850 (i.e. less than strike price of 5000) the Scheme would be protected from the downside and would exercise the put option. However, it may not result into profit. The profit is resulted only when the intrinsic value (5000 (strike price)- 4850(spot price)) is greater than the cost paid i.e. option premium of 100. Whereas if the stock price moves up to say Rs. 5,150 the Scheme may let the option expire and forego the premium.

Writing a Put Option: Assume that the Scheme writes a put option at the strike price of Rs. 5,000 and earns a premium of Rs. 100. If the market value of the underlying stock decreases to Rs. 4,850, the put option will be exercised and the Scheme will earn the premium of Rs. 100 but loses the difference between the

	<p>exercise price and the market price which is Rs. 150. However if the market price of the underlying stock is Rs. 5,150, the option-holder will not exercise the option. As a result of which the option will expire and the Scheme will earn the premium income of Rs. 100.</p> <p>A forward contract is a transaction in which the buyer and the seller agree upon the delivery of a specified quality (if commodity) and quantity of underlying asset at a predetermined rate on a specified future date.</p> <p>Please note that the above examples are based on assumptions and are used only for illustrative purposes.</p> <p>Risks associated with investment strategy which may be followed by the fund managers for investment in derivatives:</p> <p>Execution of investment strategies depends upon the ability of the fund manager to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable.</p> <p>The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.</p> <ul style="list-style-type: none"> • <u>Disclosure relating to extent and manner of participation in derivatives to be provided</u> <p>Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. The exposure to derivatives will be rebalanced to align with the underlying index changes in weights or constituents. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme. The above deviation shall not exceed for more than 7 days for the asset allocation table.</p>
--	---

	<p>The Scheme may take derivatives position based on the opportunities available subject to the guidelines provided by SEBI from time to time and in line with the overall investment objective of the Scheme. Derivatives can be traded over the exchange or can be structured between two counter-parties. Those transacted over the exchange are called Exchange Traded derivatives whereas the other category is referred to as OTC (Over the Counter) derivatives.</p> <p>Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.</p> <p>The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.</p>
